Education

Facultad de Ciencias Exactas y Naturales (Universidad de Buenos Aires)

Buenos Aires, Argentina

B.Sc. IN COMPUTER SCIENCE

Mar. 2000 - Mar. 2006

Experience

I've been developing iOS mobile applications for more than 10 years. Since 2015 I've been working in Swift, previously my work was done in Objective-C and C++. During this period, I worked in all kind of projects from games to applications, in small and medium teams (any number from 1 to 10 developers) and varying client sizes usually located in the US. Outside mobile development, I worked in Visual Basic, C, Unity3D and Visual Basic for Applications.

SimpliMuv

Buenos Aires, Argentina

IOS DEVELOPER

January 2025 - July 2025

- Worked on the maintenance and implementation of new features related to persistence of the Harley Davidson application. I worked specifically in the save rides functionality which is a core part of the app.

Conexa.ai

Buenos Aires, Argentina

IOS LEAD DEVELOPER

January 2024 - December 2024

- Joined as a mentor / guide as the team of JR and SSR developers started developing a digital wallet. My tasks consisted on helping the other devs grow and act as a source of knowledge and blockers remover. (This was a part-time, single project deal)
- On June was promoted to full-time employee.
- Worked on maintenance of old features and develop new ones.

MAKE SRL

Buenos Aires, Argentina

PRINCIPAL IOS DEVELOPER

January 2024 - June 2024

- Worked on developing an app aimed at landlords and facility managers for a start up in the real estate industry. We used a derivate of TCA, and the UI was written entirely in SwiftUI, as a result we were able to implement unit tests, which allowed us to reduce the release cadence from once per month to once per week.

Mantis Innovation and Altruas

Buenos Aires, Argentina

STAFF IOS ENGINEER

June 2023 - October 2023

- Hired to finish a project related to surveying building roofs.
- Implemented a synchronization layer enabling sharing data between multiple devices.
- Stabilized the number of tickets reported by QA, by leading the team of three to solve around 80% of them.

Blue Trail Software

Buenos Aires, Argentina

IOS LEAD DEVELOPER

February 2021 - May 2023

- Maintained and developed new features for an IoT related app.
- Created a foundation project to use in one client library of apps. The focus of this was to be able to reuse functionalities we already implemented.
- Created an app to detect driver drowsiness using ARKit and a proof of concept using MLKit.

Phinx Labs

Buenos Aires, Argentina

IOS DEVELOPER

August 2020 - February 2021

- Worked on the migration from React Native to Native of Blockfi's crypto currency app.

Blue Trail Software

Buenos Aires, Argentina

IOS DEVELOPER / IOS LEAD ENGINEER / COUNTRY MANAGER

November 2017 - May 2020

- Was promoted from iOS Developer to iOS Lead Engineer and eventually Country Manager.
- Worked on the proposal and formalization of processes related to CI and the creation of a components library, to be used in all future projects causing a reduction of 30% in development time.
- Maintained and developed new features for a workforce management app. Managed a team of 4 (1 other iOS dev, 2 Android devs, 1 QA and 1 Backend developer).
- Maintained and developed new features for a white label banking app. The app was originally meant to be used by 5 credit unions, but it's success led to more than a hundred credit unions adopting the app and customizing it.
- Managed Buenos Aires office.
- Involved in recruiting and retaining people for different teams.
- Implemented a process to slash recruitment time and costs by nearly 40%.
