Experience

I've been developing iOS mobile applications for almost 15 years. Since 2015 I've been working in Swift, and the last four years I've been using SwiftUI. During this period, I worked in all kind of projects from games to applications, in small and medium teams (any number from 1 to 10 developers) and varying client sizes usually located in the US. Outside mobile development, I worked in Visual Basic, C++, C, Unity3D and Visual Basic for Applications.

Venmo

Buenos Aires, Argentina

IOS DEVELOPER

February 2025 - Present

- Worked on an initiative to allow payments between peer to and from Paypal.
- Techs Used: Combine, SwiftUI, JSON, RESTful API

Conexa.ai

Buenos Aires, Argentina

IOS LEAD DEVELOPER

January 2024 - December 2024

- Joined as a mentor / guide as the team of JR and SSR developers started developing a digital wallet. My tasks consisted on helping the other devs grow and act as a source of knowledge and blockers remover. (This was a part-time, single project deal).
- On June was promoted to full-time employee as the project was growing.
- Techs Used: Combine, UIKit, JSON, RESTful API

MAKE SRL

Buenos Aires, Argentina

PRINCIPAL IOS DEVELOPER

January 2024 - June 2024

- We Worked on developing an app aimed at landlords and facility managers for a start up in the real estate industry. We used a derivate of TCA, and the UI was written entirely in SwiftUI, as a result we were able to implement unit tests, which allowed us to reduce the release cadence from once per month to once per week.
- Techs Used: Combine, SwiftUI, JSON, RESTful API

Mantis Innovation and Altruas

Buenos Aires, Argentina

STAFF IOS ENGINEER

June 2023 - October 2023

- Hired to finish a project related to surveying building roofs.
- Implemented a synchronization layer enabling sharing data between multiple devices.
- Stabilized the number of tickets reported by QA, by leading the team of three to solve around 80% of them.
- Techs Used: CoreData, UIKit, JSON, RESTful API

Blue Trail Software

Buenos Aires, Argentina

IOS LEAD DEVELOPER

November 2017 - May 2023

- Maintained and developed new features for an IoT related app to measure swimming pools.
- Created an app to detect driver drowsiness using ARKit and a proof of concept using MLKit.
- Worked on the proposal and formalization of processes related to CI and the creation of a components library, to be used in all future projects causing a reduction of 30% in development time.
- Maintained and developed new features for a workforce management app. Managed a team of 4 (1 other iOS dev, 2 Android devs, 1 QA and 1 Backend developer).
- Maintained and developed new features for a white label banking app. The app was originally meant to be used by 5 credit unions, but it's success led to more than a hundred credit unions adopting the app and customizing it.
- Managed Buenos Aires office.
- Involved in recruiting and retaining people for different teams.
- Implemented a process to slash recruitment time and costs by nearly 40%.
- Techs Used: Combine, SwiftUI, UIKit, XML, JSON, RESTful API, RxSwift

Education

Facultad de Ciencias Exactas y Naturales (Universidad de Buenos Aires)

Buenos Aires, Argentina

B.Sc. IN COMPUTER SCIENCE

Mar. 2000 - Mar. 2006
